

Video - Elements and compound formulae worksheet.

What is in a formula.

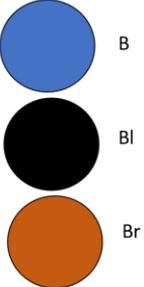

A chemical formula tells us the type and number of atoms that make up the smallest particle of particular substance. Complete the table below.

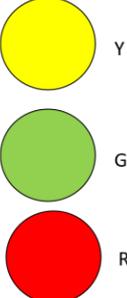

Rules for naming to make things easier

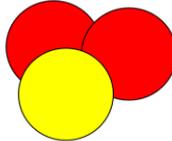

- 1- Give every colour a symbol
- 2- Use subscript if there is more than one of the same coloured atom
- 3- Write the colours in alphabetical order

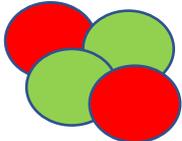

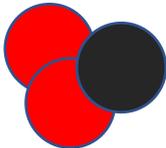

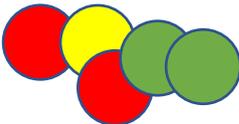

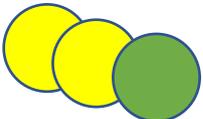

BRY

R₂Y

Diagram	Formula
	
	
	Br ₂ GR
	BRY ₄
