

Video - Elements and compound formulae worksheet. Solutions

What is in a formula.

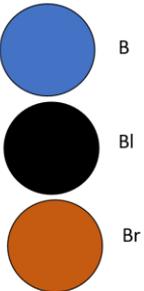

A chemical formula tells us the type and number of atoms that make up the smallest particle of particular substance. Complete the table below.

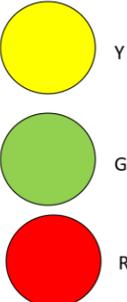

Rules for naming to make things easier

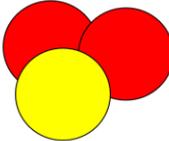

- 1- Give every colour a symbol
- 2- Use subscript if there is more than one of the same coloured atom
- 3- Write the colours in alphabetical order

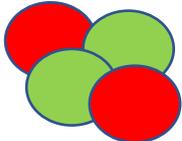

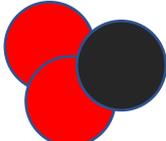

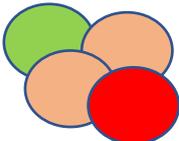

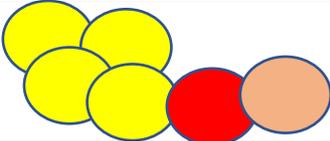

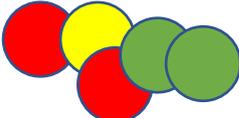

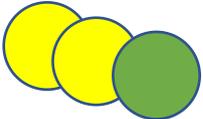

BRY

R₂Y

| Diagram | Formula |
|---|---------------------------------|
|  | G ₂ R ₂ |
|  | BIR ₂ |
|  | Br ₂ GR |
|  | BRY ₄ |
|  | G ₂ R ₂ Y |
|  | GY ₂ |
