

Organisational structure of an organism - year 8 Cells

1. Name a type of tissue in the human body and describe its function.

2. Why is it more efficient for cells to work together as tissues? Give an example.

3. Give an example of a system in an animal and describe what it does.

4. What does the digestive system do? Name two organs that are part of it and explain what each one does.

5. Why is it important for multicellular organisms to have organ systems?

What is the advantage of having specialised cells instead of all cells doing everything?

6. Using the skin as an example, explain how cells, tissues, organs and systems are related.
